DETAILED ACTION

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter:

The claims are allowable over the art of record because the prior art does not teach at least portions of the inherently tuned antenna structured to employ inherent distributed induction and inherent distributed capacitance to form a tank circuit to provide regenerative feedback into the antenna, whereby the inherently tuned antenna will have an effective area substantially greater than its physical area, in combination with the remaining claimed limitations.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Kan, Gram, Carlson, Baekgaard, Wiggenhorn, Albee and Hagmann et al are cited as of interested and illustrated a similar structure to an energy harvesting circuit.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tho G. Phan whose telephone number is 571-272-1826. The examiner can normally be reached on (M-R), Monday-Thursday (7:30-6:00).
